PART - I

Case Scenario-I

ABC Ltd., a UK firm, has a receivable \$ 20 Million due in 6 months. The company wants to cover full exposure. Following information are available :

Spot rate 1\$ = £ 0.7720 / £ 0.7840

6 months forward rate 1\$ = £ 0.7910 / £ 0.8040

Interest rates are as follows:

	US	UK
6 months deposit rate	4.50% p.a.	5.50% p.a.
6 months borrowing rate	6.00% p.a.	7.50% p.a.

Following options on pound are available :

Option	Strike rate	Price
Call	£ 0.8100	£ 0.01
Put	£ 0.8100	£ 0.02

ABC Limited has forecasted the spot rates for 6 months as follows :

Future Rates of 1\$	Probability
£ 0.7800	30%
£ 0.8100	50%
£ 0.8300	20%

$$0.805$$

(4)

LMN1

From the information given above, choose the correct answer to the question

No. 1 to 4 :

(4 × 2 = 8)

1. Identify which option gives the highest proceed.

(A) Forward hedge

(B) Option hedge

(C) Money market hedge

(D) No hedge

0.7910

0.7940

0.7701

0.805

2. What will be the total expected value of option hedge in pounds, if the full exposure of 20 Million is covered?

(A) £ 16.50 million

(B) £ 16.125 million

(C) £ 15.88 million

(D) £ 15.70 million

$$20 \times 0.7940 = 15.88$$

3. If ABC Ltd. is using forward hedge strategy, what will be total proceed in pound?

(A) £ 15.88 million

(B) £ 15.40 million

(C) £ 16.125 million

(D) £ 15.82 million

$$20 \times 0.7910 = 15.82 \text{ m.}$$

LMN1

(5)

LMN1

4. What will be expected spot rate at the end of 6 months and expected cost (proceed) if no hedge strategy is adopted by the company ?

(A) £ 0.85/\$, £ 15.8 million

~~(B) £ 0.805/\$, £ 16.10 million~~

(C) £ 0.7720/\$, £ 15.44 million

(D) £ 0.7910/\$, £ 15.82 million

$$0.805 \times 20 = 16.10$$

Case Scenario-II

Equity Researchers have estimated the rate of returns for Stock A, Stock B and Market Portfolio under each state of the economy is as under-

Economy	Probability	Return on Stock A (%)	Return on Stock B (%)	Market Portfolio (%)
Boom	0.3	16	19	18
Normal	0.4	14	16	15
Recession	0.3	-9	-7	-8

The risk-free rate of return is expected to be 8%. The covariance between Stock A and the Market Portfolio is 122.70, while the covariance between Stock B and the Market Portfolio is 125.40. Assume that the CAPM framework is valid in this market.

LMN1

$$B = \frac{\text{Cov}(a,b)}{\sigma_a^2}$$

Mkt port. var.

$$\begin{aligned}\text{mean Mkt return} &= 18 \times 0.3 \\ &+ 15 \times 0.4 \\ &+ -8 \times 0.3 \\ &= 9.1\end{aligned}$$

$$\begin{aligned}\text{var.} &= (18 - 9.1)^2 \times 0.3 + (15 - 9.1)^2 \times 0.4 \\ &+ (-8 - 9.1)^2 \times 0.3\end{aligned}$$

$$= 81 \times 0.3 + 36 \times 0.4 + 289 \times 0.3$$

$$\text{Mkt var.} = 125.4$$

$$\beta = \frac{\text{Covars}(r_i, r_m)}{\sigma_m^2}$$

$$\beta_A = \frac{122.70}{125.40}$$

$$= 0.978469$$

$$\beta_B = \frac{125.40}{125.40}$$

$$= 1$$

CAPM return A

(6)

LMN1

From the information given above, choose the correct answer to the question No. 5

(5 × 2 = 10)

to 9 :

5. Required rate of return of Stock A is _____ and Stock B is _____.

(A) 9% and 8.978%

(B) 8.9785 % and 9%

(C) 8.9875% and 9%

(D) 8.9785% and 10.4%

6. Based on calculated Alpha of Stock A and Stock B in the above case scenario, which of the following statements is correct for purchase or sale of Stock A and Stock B ?

(A) Both Stock A and Stock B have positive alpha values, suggesting they are underpriced. Therefore, purchase both stocks.

(B) Stock A has a positive alpha, and Stock B has a negative alpha. This indicates that Stock A is underpriced and Stock B is overpriced. Therefore, purchase Stock A and sell Stock B.

(C) Stock A has a negative alpha, while Stock B has a positive alpha. This means Stock A is overpriced and Stock B is underpriced. Therefore, sell Stock A and purchase Stock B.

(D) Both Stock A and Stock B have negative alpha values, indicating they are overpriced. Therefore, sell both stocks.

LMN1

(7)

LMN1

7. What is the expected rate of return (percentage) for Stocks A and B ?

(A) 10% and 9.00%

(B) 7.70% and 9.00%

(C) 7.70% and 10%

(D) 13.1% and 14.20%

8. What will be the variance of market portfolio ?

(A) -4.8

(B) 38.4

(C) 126.8

(D) 125.4

9. What will be the beta of Stock A and Stock B respectively ?

(A) 0.9862 and 1.24

(B) 0.9542 and 1.00

(C) 0.9785 and 1.00

(D) 0.9785 and 1.24

Case Scenario-III

Steady Mutual Fund has the following assets in Scheme – Star Gold at the close of business as on 31st March, 2025:

<u>Company</u>	<u>No. of Shares (units)</u>	<u>Market Price per share (₹)</u>
A Ltd.	20,000	25
B Ltd.	30,000	350
C Ltd.	38,000	290
D Ltd.	50,000	400

The total numbers of units of Scheme – Star Gold are 20 lakhs. The Scheme – Star Gold has accrued expenses of ₹ 2,00,000 and other liabilities of ₹ 2,50,000.

From the information given above, choose the correct answer to the question No.

10 to 12 :

(3 × 2 = 6)

10. Total gross value of the Scheme – Star Gold is –

(A) ₹ 420.20 lakhs

(B) ₹ 325.00 lakhs

(C) ₹ 480.40 lakhs

(D) ₹ 520.30 lakhs

₹ (A × B)

(9)

LMN1

11. Total net value of the Scheme – Star Gold is –

(A) ₹ 420.70 lakhs

(B) ₹ 422.70 lakhs

~~(C) ₹ 415.70 lakhs~~

(D) ₹ 424.70 lakhs

SAB

– 4.5 lakhs

12. NAV per unit of the Scheme – Star Gold is –

(A) ₹ 21.035

(B) ₹ 21.135

~~(C) ₹ 20.785~~

(D) ₹ 21.235

415.70

20

= 20.785

Case Scenario-IV

Mr. X, an investor buys the stocks of WBL Limited worth ₹ 21,60,000 due to very strong fundamentals. Since last 3 months, the market sentiment is weak and witnessed a significant volatility and considered to remain weak for about the next three months. Keeping in the mind volatility in the market, Mr. X is planning to hedge his portfolio in the future market. The Beta of WBL stock is 1.3 and the current value of NIFTY is 2250 and 3 months future is selling at 2310. The current market price of the WBL stock is ₹ 240. Each Nifty future can be trade in units of 240 only.

LMN1

(10)

LMN1

Assume there is no transaction cost and M to M Margin.

From the information given above, choose the correct answer to the question No.

13 to 15 :

(3 × 2 = 6)

13. Number of future contract to be buy/sell to hedge WBL stock against expected fall in the market (rounded off contracts)

- (A) ~~Sell 5~~ future contracts
- (B) Buy 6 future contracts
- (C) Buy 5 future contracts
- (D) ~~Sell 6~~ future contracts

$21,6000 \times 1.3$
 2310×240
 5.06

14. If Nifty index fall by 10% from 2250 to 2025 and WBL stock falls to ₹ 212, what will be Net Gain/Loss if portfolio was hedged on NIFTY future ?

- (A) Net Gain ₹ 3,02,100
- (B) Net Gain ₹ 3,42,000
- (C) Net Gain ₹ 50,100
- (D) Net Gain ₹ 90,000

$$A \approx 5$$

round up to 6.

Sell nifty futures 6

(14)

spot falls by 10%.

$\Rightarrow$ future also falls by 10%.

$$2310 \times 0.9$$

new future val.

$$= 2079.$$

$$\text{change} = 231$$

$$\text{gain or shut futures} = 231 \times 6 \times 240$$

(A)

= 332640 gain

$$\text{loss on put fm} = 9000 \times [240 - 212] = 28$$

$$\left(\frac{21.6 \text{ lbs}}{240} \right)$$

$$9000 \times 28$$

(B)

= 252000 loss

$$\text{net gm} = 332640 - 252000$$

= 80640

Ans (D) 90000 credit.

(15)

Wifey rises by 6%.

future also rises by 6% for

$$2310 \text{ i.e. } 2310 \times 6\% = 138.6$$

$$\text{loss on Wifey} = 138.6 \times 6 \times 200$$

$$= -199584$$

gain on stock =

$$9000 \times [255 - 240]$$

=

135000 gain

$$\text{net ms} = -199584 + 135000 = -64584$$

Alternative solution

(13) $5.06 \times 8.0 \text{ of } 5 \text{ Ans (A)}$

(14) 10% pnu dec is after 3 months

so after 3 months Spot = 2025

$$\begin{aligned}\text{gain} &= (2310 - 2025) \times 5 \times 240 \\ &= 285 \times 5 \times 240 \\ &= 342000 \quad (\text{A})\end{aligned}$$

$$\begin{aligned}\text{loss on margin} &= 9000 \times 28 = \\ &= 252000 \quad (\text{B})\end{aligned}$$

$$A + B = 90000 \quad \text{Ans (D)}$$

(15) Index rises by 0.1.

$$2385$$

$$\begin{aligned}\text{loss a futures} &= -2385 + 2310 \\ &= -75\end{aligned}$$

$$-75 \times 5 \times 240 = -90000$$

$$\begin{aligned}\text{gain a put this} &= (255 - 240) \\ &= 15 \times 9000\end{aligned}$$

$$= 13500$$

net gain 4500

Ans. (A) 4500 Net gain.

(11)

LMN1

15. If NIFTY index rises by 6% from 2250 to 2385 and WBL stock rises to ₹ 255,

what will be Net Gain/Loss when portfolio was ~~in~~ hedged?

(A) ~~Net Gain ₹ 45,000~~

(B) ~~Net Loss ₹ 90,000~~

(C) Net Gain ₹ 1,35,000

3. (a) BC Ltd. is contemplating on buying a new machine at ₹ 70,00,000 with an additional working capital requirement of ₹ 10,00,000. The machine is expected to have an economic useful life of 5 years, with no salvage value. The company follows the straight line method of depreciation and same is accepted for tax purposes. The machine is expected to generate an incremental increase in the before tax cash operating income of ₹ 25,00,000 (in real terms) per year for a period of 5 years. The relevant tax rate is 35%. Inflation is expected to be 6% per year and the firms cost of capital in real term is 10% per year. Assuming that the working capital requirement will remain unchanged throughout the period, in spite of inflation.

6

Advise the company whether the machine should be purchased or not. Show your NPV calculation in real term.

Calculation upto two decimal place.

PV Factor at 10% & 6% are as under -

PV factor	1	2	3	4	5

- (b) Mr. X has excess cash of ₹ 50 lakhs which he wants to invest in 4 short-term marketable securities.

Expenditure relating to this investment will be ₹ 1,25,000 and the securities invested will have an annual yield of 9%.

Mr. X seeks your advice –

- (i) as to the period of investment so as to earn a pre-tax income of 5%.
- (ii) as to the minimum period to break-even his investment expenditure.

- (c) Mr. J believes that the market has demonstrated a weak type of efficiency. Explain the various types of tests that can be used to prove the weak form of efficient market theory.

4. (a) Peacock Inc., a US based company, is planning to set up a software development unit in India. The unit will remain in existence in India for one year and the software is expected to get developed within this time frame. Software developed will be bought back by the US parent at a transfer price of USD 4 Million. The software developed will be sold in the US for USD 6 Million. Other estimates are as under :

- (i) Rent for fully furnished unit with necessary hardware in India is ₹ 25,00,000.

3(b)

(i)

$$\text{Profit} = 5\%$$

$$\text{Return} - \text{Exp} = 5\%$$

fresh

$$(9\% \times 50 \text{ kg} \times n) - 1.25 \text{ kg} = 5\%$$

50 kg

$$4.5 \text{ kg} \times n - 1.25 = 2.5$$

$$4.5 \text{ kg} \times n = 3.75$$

$$n = \frac{3.75}{4.5} = \frac{5}{6}$$

$$= \frac{5}{6} \times 12 = 10 \text{ days}$$

(ii)

Return

$$4.5 \text{ kg} \times n = 1.25 \text{ kg}$$

$$n = \frac{1.25}{4.5} = \frac{5}{18}$$

$$= 3.33 \text{ H} \quad \therefore \frac{5}{18} \times 12^2 = \frac{10}{3}$$

(c) Run test & Auto complete test.

(ii) Manpower Cost - 120 software professionals will be working for 10 hours @ ₹ 275 per man-hour each day for 350 effective days in the year.

(iii) Administrative and Other Costs is ₹ 50,00,000.

(iv) The rupee-dollar rate is ₹ 84 per USD.

Peacock Inc. will enjoy the following privileges in India:

(A) All profits can be repatriated.

(B) No withholding taxes.

(C) Corporate taxes @ 20 percent on earnings.

Assume 365 days in year.

Advise Peacock Inc. on the financial viability of the project.

(b) GL Ltd. is having a Price Earnings Ratio (P/E Ratio) of 16 times and Earnings per Share (EPS) of ₹ 5. The total numbers of outstanding shares are 2,80,000.

FL Ltd. another company is also in the same industry. The GL Ltd. is in negotiation for acquisition of the FL Ltd. by issuing shares in the ratio of 4:5, i.e., for 5 shares of FL Ltd., 4 shares of GL Ltd. will be issued. The outstanding shares of FL Ltd. are 50,000. The EPS of the merged entity will be ₹ 5.4.

You are required to calculate-

(i) Pre-merger EPS of FL Ltd.

(ii) Number of shares of GL Ltd. to be issued to FL Ltd. if pre-merger EPS of GL Ltd. is to be maintained.

(b)

CMR 80

gm 2.8 kg

5000

Mcap 224 kg

PAT 14 lag

Swap ratio 5 of FL for 4 of GL.

Post mrg. EPS = 5.4

(i) $\text{gm intd} = \frac{5000}{5} \times 4 = 4000$

new gm out = $2.8 + 0.4 = 3.2 \text{ kg}$

new EPS = 5.4

new PAT = $5.4 \times 3.2 \text{ kg}$
= 17.28 lag

$$\text{Gr1 pat} = 14 \text{ kg}$$

$$\Rightarrow \text{FL PAT} = 3.28 \text{ kg}$$

$$\begin{aligned} \text{Fl' EPS} &= 3.28 \\ &= 5000 \\ &= 156.56 \end{aligned}$$

If we run 1 EPS to be reached for

$$\frac{\text{PAT}}{\text{S-out}} = \text{EPS}$$

$$\frac{17.28}{2.8 + n} = 5$$

$$2.8 + n$$

$$17.28 = 14 + n$$

$$3.28 = 5n$$

$$n = 3.28 / 5$$

$$= 65600 \text{ gms}$$

The closing prices of Nifty Future for 5 days are given below :

Date	Closing price of Nifty Future
01 January, 2025	25,520
02 January, 2025	25,390
03 January, 2025	25,250
04 January, 2025	24,800
05 January, 2025	25,100

Evaluate the following :

- (i) Daily balances in margin account and payment on margin calls, if any.
- (ii) If contract squared off on 5th January 2025, gain or loss to Mr. RS
- (iii) If Mr. RS taken the short position, gain or loss to Mr. RS.

- (b) DEF Ltd. has implemented a strategy to manage its exposure to fluctuating interest rates by engaging in both interest rate caps and floors.

The company has purchased \$ 50,00,000 (i.e. call options on interest rates) cap of 8% at a premium of 0.75% of the face value to protects against rising interest rates. \$ 50,00,000 (i.e. put options on interest rates) floor of 5% is also available at a premium of 0.85% of face value.

You are required to analyze the following situation:

- (i) If Interest rate rise to 10 percent, what is the amount received by DEF Ltd. ? What are the net savings from the cap ?

(11)

LMN2

- (ii) If DEF Ltd. also purchases a floor, what are net savings if interest rate rises to 10% ?
 - (iii) Calculate net savings if interest rates fall to 4 percent considering cap & floor both purchase.
 - (iv) If DEF Limited has purchases the cap and sell the floor and there is price rise is 11%, what will be net saving to the company ?
-

LMN2

6(b) 50 lac USD cap @ 8% for 0.75 yrs.

50 lac USD floor @ 5% for 0.85 yrs.

(i) int rate = 10%

cap gm = 2% x 50 lac USD
= 1 lac USD.

leg pm 0.75% of 50 lac.

0.375 lac USD

net savings = 0.625 lac USD

(ii) If floor is pushed & int rate goes to 10% entire premium is re 0.85% on 50 lac USD

net savings = 62500 - 42500 = 20000

(iii) If int falls to 4%.
