## Revisionary Test Paper December 2018

# Intermediate <br> Group I <br> Paper 8 : COST ACCOUNTING <br> (SYLLABUS - 2016) 

## Objectives

1. (a) Multiple choice questions:
(i) What is prime cost
(A) Total direct cost only
(B) Total Indirect production cost
(C) Total non-production cost
(D) Total Production cost.
(ii) If the raw material price is affected by inflation, which of the following methods of valuing stocks will give the lowest gross profit?
(A) FIFO
(B) Simple average
(C) LIFO
(D) Replacement Cost
(iii) If the activity based costing, cost are accumulated by
(A) Cost pool
(B) Cost Objectives
(C) Cost benefit analysis
(D) None of the above
(iv) $\qquad$ costing is must for Inter-firm comparison
(A) Batch
(B) Uniform
(C) Marginal
(D) None of the above
(v) Given that sales $=₹ 1,50,000$, Variable cost $=60 \%$,Fixed cost $=₹ 40,000$,the operating leverage will be
(A) 2.2
(B) 2.5
(C) 3
(D) None of the above
(vi) Selling price of a product is ₹ 6 per unit, variable cost ₹ 4 per unit fixed cost is ₹ 15,000.then Brake Even point in units will be:
(A) 10,000
(B) 7,500
(C) 5,000
(D) 15,000

## Revisionary Test Paper December 2018

(vii) $A B$ Ltd. uses pre-determined overhead rate of $₹ 17$ per labour hour. The actual labour hours are 5,950 and the actual overhead cost is $₹ 1,10,000$.There is
(A) ₹ 8,850 over absorption
(B) ₹ 8,850 under absorption
(C) ₹ 1,000 under absorption
(D) ₹10,000 over absorption
(viii) CAS16 Stands for
(A) Pollution Control Cost
(B) Direct Expenses
(C) Depreciation \& Amortisation
(D) Joint Cost
(ix) When overtime is required for meeting urgent orders, overtime premium should be
(A) Charged to costing profit and loss A/c
(B) Charged to Overhead Cost
(C) Charged to respective Jobs
(D) Ignored.
(x) In which of the following incentive plan of payment of wages on time basis are not Guaranteed?
(A) Halsey plan
(B) Rawan plan
(C) Taylor's differential piece rate system
(D) Gantt's task and bonus system
(xi) The Valuation of Closing stock according to Last in first out method of pricing is done at
(A) The latest Prices
(B) The earliest Prices
(C) At average Prices
(D) None of the above.
(xii) $\qquad$ + Profit = Sales
(A) Cost of sales
(B) Overhead cost
(C) Prime Cost
(D) Direct Cost
(xiii) In job cost system, cost are accumulated
(A) On a monthly basis
(B) By specific job
(C) By department or process
(D) By Kind of material used
(xiv) Difference between standard cost and actual cost is called as
(A) Wastage
(B) Loss
(C) Variance

## Revisionary Test Paper December 2018

(D) Profit
(xv) Budget are $\qquad$ plans.
(A) Control
(B) Action
(C) Profit
(D) Finance
(xvi) Standard time is 60 hours and guaranteed time rate is ₹50 per hour. Under Rowan Plan, what is the amount of wages, if job is completed in 48 hrs.
(A) ₹ 2,480
(B) ₹ 2,680
(C) ₹ 2,880
(D) None of the above
(xvii) Which method of costing Interior decoration
(A) Process Costing
(B) Multiple Costing
(C) Operating Costing
(D) Job Costing
(xviii) Marginal Costing Technique follows the following basis of classification
(A) Element Wise
(B) Function Wise
(C) Behavior wise
(D) Identifiably Wise
(xix) The difference between fixed cost \& variable cost assumes significance in the preparation of the following budget.
(A) Master Budget
(B) Flexible Budget
(C) Cash Budget
(D) Capital Budget
(xx) Depreciation is a example of-
(A) Fixed Cost
(B) Variable Cost
(C) Semi Variable Cost
(D) None of the above

Answer:

| i(D) | ii(C) | iii(A) | $\operatorname{Iv}(C)$ | $v(C)$ |
| :---: | :---: | :---: | :---: | :---: |
| vi(B) | vii(C) | viii(C) | $\mathrm{ix}(\mathrm{B})$ | $\mathrm{x}(\mathrm{C})$ |
| $\mathrm{xi}(\mathrm{A})$ | xii(A) | xiii(B) | $\operatorname{xiv(C)}$ | $x v(B)$ |
| $x v i(C)$ | $x v i i(D)$ | $x v i i i(C)$ | $\operatorname{xix}(B)$ | $x x(A)$ |

## Revisionary Test Paper December 2018

(b) Match the following:

| Column 'A' |  | Column 'B' |  |
| ---: | :--- | :--- | :--- |
| $\mathbf{1}$ | Non Integrated Accounts | A | CAS21 |
| $\mathbf{2}$ | Apportionment of Overheads | B | CAS 16 |
| 3 | Cost Accounting Standard on Treatment of <br> revenue in cost statement | C | Reciprocal Method |
| $\mathbf{4}$ | Cost Accounting Standard on Quality Control | D | CAS 24 |
| $\mathbf{5}$ | Zero Based Budgeting | E | Profitability rate |
| $\mathbf{6}$ | De-merit of a centralized purchase organization | F | Job Evaluation |
| $\mathbf{7}$ | Research and Development Costs | G | High Initial Cost |
| $\mathbf{8}$ | Point Rating | H | CAS18 |
| 9 | Angle of incidence | I | Decision Package |
| $\mathbf{1 0}$ | Depreciation \& Amortisation | J | Cost Ledger Accounts |

Answer:

| $1(\mathrm{~J})$ | $2(\mathrm{C})$ | $3(\mathrm{D})$ | $4(\mathrm{~A})$ | $5(\mathrm{I})$ | $6(\mathrm{G})$ | $7(\mathrm{H})$ | $8(\mathrm{~F})$ | $9(\mathrm{E})$ | $10(\mathrm{~B})$ |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

(c) State whether the following statements are true or false:
(i) Fixed Costs vary with volume rather than time.
(ii) ABC analysis is based on the unit price of materials.
(iii) Loss = Brake even sales - actual sales.
(iv) Variable overhead vary with time.
(v) Cash discounts are generally excluded completely from costs.
(vi) Store ledger is maintained in the store department.
(vii) As per the payment of Bonus Act, 1965 the maximum limit of bonus is $8.33 \%$ of gross earning.
(viii) Departments that assist producing department indirectly are called service departments.
(ix) Overhead are taken on estimated basis in financial accounts.
(x) Cost control accounts are prepared on the basis of double entry system.

Answer:

| i (F) | ii (F) | iii (T) | iv (F) | v (F) | vi (T) | vii (F) | viii (T) | ix (F) | $\times(T)$ |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

(d) Fill in the blanks
(i) Breakeven point =contribution = $\qquad$ .
(ii) Re-order level = $\qquad$ usage multiplied by $\qquad$ lead time.
(iii) In absorption costing $\qquad$ cost is added to inventory.

## Revisionary Test Paper December 2018

(iv) Penalties/damages paid to statutory authorities $\qquad$ be form part of Direct Expenses.
(v) The function of CASB is to assists the members in preparations of uniform $\qquad$ under various statue.
(vi) Salary paid to factory manager is an item of $\qquad$ .
(vii) Equivalent production of 1,000 units, $60 \%$ complete in all respects is $\qquad$ .
(viii) Excess of Actual cost over Standards Cost is treated as $\qquad$ variance.
(ix) In electricity companies, the cost unit is $\qquad$ _.
(x) A cost which does not involve any cash outflow is called $\qquad$ or $\qquad$ .

Answer:

| i (Fixed Cost) |  <br> Minimum) | iiii(Fixed Cost) | iv(Shall Not) | v(Cost <br> Statement) |
| :--- | :--- | :--- | :--- | :--- |
| vi(Factory <br> Overhead) | vii(600 units) | viii(unfavorable <br> variance) | ix(Kilowat) | x(Notional cost, <br> Imputed cost |

## Material

2. (a) From the following particulars with the respect to a particulars item of material of $X Y Z$ manufacturing company calculate the best quantity to order:

| Ordering Quantities (Tons) | Price per Ton (₹) |
| :--- | ---: |
| less than 500 | 12 |
| 500 but less than 1,000 | 11.80 |
| 1,000 but less than 2,000 | 11.60 |
| 2,000 but less than 4,000 | 11.40 |
| 4,000 Above | 11.20 |

(b) The particulars relating to $1,200 \mathrm{~kg}$. of a certain raw material purchased by a company during June, were as follows:-
Lot prices quoted by supplier and accepted by the Company for placing the purchase order:

Lot upto $1,000 \mathrm{kgs}$. @ ₹ 22 per kg.
Between 1,000-1,500 kgs, @ ₹20 per kg.
Between 1500 -2000 kgs. @ ₹18 per kg.
Trade discount - 20\%.
Additional charge for containers @ ₹ 10 per drum of 25 kgs.
Credit allowed on return of containers, @ ₹ 8 per drum.
GST at $10 \%$ on raw material and $5 \%$ on drums.
Total fright paid by the purchaser ₹ 240/-
Insurance at $\mathbf{2 . 5 \%}$ (on net invoice value) paid by the purchaser.
Stores overhead applied at $5 \%$ on total purchase cost of material.

## Revisionary Test Paper December 2018

The entire quantity was received and issued to production.
The containers are returned in due course. Draw up a suitable statement to show:-
(a) Total cost of material purchased and
(b) Unit cost of material issued to production.

## Answer:

2. (a) Statement showing computation of total Inventory cost at different order size

| Particulars |  | Ordering Quantities(tons) |  |  |  |  |
| :--- | :--- | ---: | ---: | ---: | ---: | ---: |
|  |  | 400 | 500 | 1000 | 2000 | 4000 |
|  | 12 | 11.8 | 11.6 | 11.4 | 11.2 |  |
| i | Purchasing cost | 48000 | 47200 | 46400 | 45600 | 44800 |
| ii | No of orders | 20 | 16 | 5 | 2 | 1 |
| iii | Ordering Cost | 120 | 96 | 30 | 12 | 6 |
| iv | Average Cost | 200 | 250 | 500 | 1000 | 2000 |
| v | Inventory carrying cost per unit | 3 | 2.95 | 2.9 | 2.85 | 2.8 |
| vi | Inventory carrying cost (iv) $\times(\mathrm{v})$ | 600 | 737.5 | 1450 | 2850 | 5600 |
| vii | Total Inventory Cost(i)+(iii) $+($ vi) | 48720 | 48034 | 47880 | 48462 | 50406 |

For the above computations the best quantity order is 1000 tons.
Note: Minimum ordering quantity assumed to be 200 tons; it may be any quantity below 250 tons but the decision will remain same.
(b) Statement showing computation of total cost of material purchased and unit cost of material issued for production

| Particulars | Unit Cost ( $₹$ ) | Total $\operatorname{Cost}$ (₹) |
| :---: | :---: | :---: |
| Basic price of material | 20.0000 | 24000 |
| less: Trade Discount | 4.0000 | 4800 |
|  | 16.0000 | 19200 |
| Add: Drum Charges (1200/25*10) | 0.4000 | 480 |
| Add: GST |  |  |
| 19,200x 10\% = 1920 |  |  |
| $480 * 5 \%=24$ |  |  |
| 1944 | 1.6200 | 1944 |
| Net Invoice Value | 18.0200 | 21624 |
| Add: Insurance ( $21,624 \times 2.5 \%$ ) | 0.4505 | 540.6 |
| Add: Freight Paid | 0.2000 | 240 |
| Less: Credit for drums returned (1,200/25x8) | 0.3200 | 384 |
| Total Cost of Material Purchased | 18.3505 | 22020.6 |
| Add: Stores Overhead (22,020.60x5\%) | 0.9175 | 1101.03 |
| Material cost issued for production | 19.2680 | 23121.63 |

## Revisionary Test Paper December 2018

3. $M / s$ Tubes Ltd. are the manufacturers of picture tubes for T.V. The following are the details of their operation during the year 2017:

| Average monthly market demand | 2,000 Tubes |
| :--- | ---: |
| Ordering Cost | ₹150 per order |
| Inventory carrying cost | $20 \%$ per annum |
| Cost of tubes | $₹ 600$ per tube |
| Normal usage | 150 tubes per week |
| Minimum usage | 60 tubes per w eek |
| Maximum usage | 220 tubes per week |
| Lead time to supply | $8-10$ weeks |

Compute from the above:
(i) Economic order quantity. If the supplier is willing to supply quarterly 1,950 units at a discount of $8 \%$ is it worth accepting?
(ii) Re-order level
(iii) Minimum level of stock
(iv) Maximum level of stock

## Answer:

A = Annual usage of tubes $=$ Normal usage per weeks $\times 52$ weeks $=150$ tubes $\times 52$ weeks =7800 tubes
O = Ordering cost per order = ₹ 110 per order
C = Inventory carrying cost per unit per annum
$=25 \%^{*}$ ₹ $600=$ ₹ 150 per unit, per annum
i. Economic Order Quantity
E.O. $Q=\sqrt{\frac{2 A O}{C}}=\sqrt{\frac{2 \times 7,800 \text { units } \times 150}{150}}=125$ tubes (Approx)

If the supplier is willing to supply 1950 tubes at a discount of $8 \%$ is it worth accepting?
Total cost (when order size is 1950 tubes) $=$ Cost of 7,800 units + ordering cost + carrying cost

$$
\begin{aligned}
& =7,800 \text { units } \times ₹ 552+\left(\frac{7800}{125} \times 150\right)+(125 \times 20 \% \times 600) / 2 \\
& =₹ 43,05,600+₹ 600+₹ 1,07,640 \\
& =₹ 44,13,848
\end{aligned}
$$

Total Cost (when order size is 125 tubes)

$$
=7800 \text { tubes } x ₹ 600+\left(\frac{7800}{125} \times 150\right)+(125 \times 20 \% \times 600) / 2
$$

## Revisionary Test Paper December 2018

$$
\begin{aligned}
& =₹ 46,80,000+₹ 9,360+₹ 7,500 \\
& =\text { ₹ } 46,96,860
\end{aligned}
$$

Since the total cost under quarterly supply of 1950 tubes with $8 \%$ discount is lower than that when order size is 125 tubes, the offer should accepted. While accepting this offer capital blocked on order of 1,950 tubes per quarter has ignored.
ii. Re-Order Level:
= Maximum Consumption X Maximum lead time
$=220$ tubes $\times 10$ weeks $=2,200$ tubes.
iii. Minimum Level of Stock:
= Re-order level - Normal usage $X$ Average re order period
$=2,200$ tubes -150 tubes $X 9$ weeks $=850$ tubes.
iv. Maximum Level of Stock
= Re-order level + Re-order quantity - Min Usage X Min re-order period
$=2,200$ tubes +125 tubes -60 tubes X 8 weeks $=2,145$ tubes

## Labour

4. (a) Measurement of Employee Cost (with special items)

Trial Balance as on 31.3.2018 (relevant extracts only)

| Particulars | Amount <br> $(₹)$ | Particulars | Amount (₹) |
| :--- | ---: | :--- | ---: |
| Materials consumed | $1,05,00,000$ |  | $5,75,000$ |
| Salaries | $45,00,000$ | Special Subsidy received <br> from Government towards <br> Employee salary |  |
| Employee Training Cost | $2,00,000$ | Recoverable amount from <br> Employee out of <br> perquisites extended | $1,35,000$ |
| Perquisites to Employees | $8,50,000$ |  |  |
| Contribution to Gratuity Fund | $8,00,000$ |  |  |
| Lease rent for accommodation <br> provided to employees | $6,00,000$ |  |  |
| Festival Bonus | $1,05,000$ |  |  |
| Unamortised amount of <br> Employee cost related to a <br> discontinued operation | 90,000 |  |  |

## Revisionary Test Paper December 2018

(b) The following information is given:

Standard time allowed $=1$ hour for 1 unit.
Actual time taken by a worker $=32$ hours for 40 units
Standard Wage rate: ₹ 20 per unit or ₹ 20 per hour

Calculate the earnings of the worker under -
(i) Taylor's Differential Piece Rate System
(ii) Merrick Differential Piece Rate System
(iii) Gantt Task Bonus Plan (High piece rate $=$ ₹ $35 /$ unit)
(iv) Halsey Premium Plan
(v) Rowan Plan

## Answer:

(a)

|  | Particulars | Amount (₹) |
| :---: | :--- | ---: |
|  | Salaries | $45,00,000$ |
| Add | Net Cost of Perquisites to Employees <br> Cost of Perquisites (-) amount recoverable from employee <br> $=8,50,000(-) 1,35,000$ | $7,15,000$ |
| Add | Lease rent paid for accommodation provided to employee | $6,00,000$ |
| Add | Festival Bonus | $1,05,000$ |
| Add | Contribution to Gratuity Fund | $8,00,000$ |
| Less | Special subsidy received from Government towards employee salary | $(5,75,000)$ |
| Employee Cost |  | $61,45,000$ |

Note:
(i) Recoverable amount from employee is excluded from the cost of perquisites.
(ii) Employee training cost is not an employee cost. It is to be treated as an Overhead, hence, not included.
(iii) Special subsidy received is to be excluded, as it reduces the cost of the employer
(iv) Unamortized amount of employee cost related to a discontinued operation is not an includible item of cost.
(b) Standard hours=40; Actual Hours taken=32; Savings $=8$ Hours

Statement showing total earning in different plan (₹)

| Taylor's Differential <br> Piece Rate System | Merrick <br> Differential Piece <br> rate System | Gantt Task <br> Bonus Plan | Halsey Premium <br> Plan | Rowan Plan |
| :--- | :---: | :---: | :---: | :---: |
| $120 \% \times 40 \times 20=960$ | $120 \% \times 40 \times 20=$ <br> 960 | $40 \times 35=$ | 1400 | $(32 \times 20)+(.5 \times 8 \times 20)$ <br> $=640+80=720$ |

## Revisionary Test Paper December 2018

5. The Employees in a factory are paid wages at the rate of $₹ 14$ per hour for an eight hour shift. Each employee produces 5 unit per hour the overhead ₹ 20 direct labour hour. Employees and the management are considering the following piece rate wage proposal:

|  | Per Unit (₹) |
| :--- | ---: |
| Upto 45 units per day of $\mathbf{8}$ hour | 2.60 |
| From 46 units to 50 Units | 3.20 |
| From 51 units to 55 units | 3.30 |
| From 56 units to 60 units | 3.40 |
| Above 60 units | 3.50 |

The working hours are restricted to 8 hour per day. Overhead rate does not change with increased production. Prepare a statement indicating advantages to employees as well as to management to production levels of $40,50,55,60 \& 65$ units.

## Answer:

Time rate for 5 unit $=$ Wage + Overhead $=₹ 14+₹ 20=₹ 34 / \mathrm{hr}$
Cost of production per unit $=34 / 5=₹ 6.80$

Statement showing the saving to employees

| Units(A) | Time rate <br> wage $(\mathrm{B})(₹)$ | Piece rate per <br> unit(C)(₹) | Piece rate wage <br> $(\mathrm{D})=(\mathrm{BXC}))(₹)$ | Savings(E)=(D-B)(₹) |
| :---: | :---: | :---: | :---: | :---: |
| 40 | 112 | 2.6 | 104 | -8 |
| 45 | 112 | 2.6 | 117 | 5 |
| 50 | 112 | 3.2 | 160 | 48 |
| 55 | 112 | 3.3 | 181.5 | 69.5 |
| 60 | 112 | 3.4 | 204 | 92 |
| 65 | 112 | 3.5 | 227.5 | 115.5 |

Statement Showing the saving to the Management

| Units <br> $(A)$ | Hours <br> $(B)$ | Time <br> rate <br> Cost <br> $(C)(₹)$ | Time rate basis of <br> total wages <br> (inclusive overhead) <br> $(D)=(B X C)(₹)$ | Piece <br> Rate Cost <br> $(E)(₹)$ | Piece Rate <br> Basis <br> Overhead <br> $(F)(₹)$ | Total $(G)$ <br> $(E+F)(₹)$ | Savings to the <br> Management <br> $(H)=(D-G)(₹)$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 40 | 8 | 34 | 272 | 104 | 160 | 264 | 8 |
| 45 | 9 | 34 | 306 | 117 | 160 | 277 | 29 |
| 50 | 10 | 34 | 340 | 160 | 160 | 320 | 20 |
| 55 | 11 | 34 | 374 | 181.5 | 160 | 341.5 | 32.5 |
| 60 | 12 | 34 | 408 | 204 | 160 | 364 | 44 |
| 65 | 13 | 34 | 442 | 227.5 | 160 | 387.5 | 54.5 |

## Revisionary Test Paper December 2018

## Direct Expenses

6. The following information relates to the activities of a production department of factory for a certain period.

|  | $(₹)$ |
| :--- | ---: |
| Material used | 46,800 |
| Direct Wages | 39,000 |
| Labour hours | 15,600 |
| Hours of Machinery -Operation | 26,000 |
| Overhead chargeable to the Dept | 32,760 |

On one order carried out in the department during the period the relevant data were:-

| Material used $(₹)$ | 7,800 |
| :--- | ---: |
| Direct Wages $(₹)$ | 6,435 |
| Labour hours worked(Hours) | 2,145 |
| Machine Hours | 1,560 |

Calculate the overheads chargeable to the job by four commonly used methods.

## Answer:

The four commonly used methods of absorbing or recovering overheads are as follows:

1. \% of overhead on material $=(32,760 / 46,800) \times 100=70.00 \%$
2. \% of overhead on direct wages $=(327,60 / 39,000) \times 100=84 \%$
3. Overhead rate per labour hour $=32,760 / 15,600=₹ 2.10$
4. Machine hour rate method $=32,760 / 26,000=₹ 1.26$

The overheads chargeable to job under the above methods is as follows:

1. Material $=7,800 \times 70 \%=₹ 5,460$
2. Wages $=6,435 \times 84 \%=₹ 5,405.40$
3. Labour hour rate $=2,145 \times 2.10=₹ 4,504.50$
4. Machine hour rate $=1,560 \times 1.26=₹ 1,950$
5. For a production department of a manufacturing company you are required to:
(a) prepare a fixed budget of overhead;
(b) prepare a flexible budget of overhead, at $70 \%$ and $110 \%$ of budget volume;
(C)Calculate a departmental hourly rate of overhead absorption as per (a) and (b) above

The budget level of activity of the department is 5,000 hours per hours per period and the study of the various items of expenditure reveals the following:

## Revisionary Test Paper December 2018

|  | ₹ |  | ₹ Per hour |
| :---: | :---: | :---: | :---: |
| Indirect wages |  |  | 0.48 |
| Repairs |  |  |  |
| upto 2,000 hours | 120 |  |  |
| for each additional 500 hours |  |  |  |
| upto a total of 4,000 hours | 42 |  |  |
| Additional from 4,001 to 5,000 hours | 72 |  |  |
| Additional above 5,000 hours | 84 |  |  |
| Rent and Rates | 420 |  |  |
| Power |  |  |  |
| Upto 3,600 hours | 0.3 |  |  |
| for hours above 3,600 | 0.24 |  |  |
| Consumable supplies |  |  | 0.288 |
| Supervision |  |  |  |
| Upto 2,500 hours |  |  | 480 |
| Additional for each extra 500 hours |  |  |  |
| above 2,500 and upto 5,000 hours |  |  | 120 |
| Additional above 5,000 hours |  |  | 180 |
| Depreciation |  |  |  |
| upto 5,000 hours |  |  | 780 |
| Additional for each extra 500 hours |  | 204 |  |
| Cleaning |  |  |  |
| upto 4,000 hours |  | 72 |  |
| Additional for each extra 500 hours |  | 24 |  |
| Heat and lighting |  |  |  |
| from 2,100 hours to 3,500 hours |  | 144 |  |
| from 3,501 hours to 5,000 hours |  | 180 |  |
| above 5,000 hours |  | 210 |  |

## Answer:

| Particulars | $(3,500) 70 \%$ | $(5,000) 100 \%$ | $(5,500) 110 \%$ |
| :--- | :---: | :---: | :---: |
| Indirect Wages (48/hrs.) | 1,680 | 2,400 | 2,640 |
| Repairs | 246 | 360 | 444 |
| Rent \& Rates | 420 | 420 | 420 |
| Power | 1,050 | 1,416 | 1,536 |
| Consumable Supplies | 1008 | 1440 | 1584 |
| Supervision | 720 | 880 | 1,260 |
| Depreciation | 780 | 780 | 984 |
| Cleaning | 72 | 72 | 96 |
| Heating \& Lighting | 144 | 180 | 210 |
| Total | 6,120 | 7,948 | 9,174 |
| OH rate per hour | 1.749 | 1.590 | 1.668 |

## Revisionary Test Paper December 2018

1. If the under absorbed OH is $10 \%$ or more of actual OH incurred - supplementary OH rate is applied. (or)
2. If the amount is considerable, supplementary OH rate applied otherwise we may follow, transferring to P\&L or Carry forward to next year.

Working Notes:

| Hours | 3,500 | 5,000 | 5,500 |
| :---: | :---: | :---: | :---: |
| Repairs | $120+\left(3^{*} 42\right)=246$ | $120+(4 \times 42)+72=360$ | $120+(4 \times 42)+72+84=444$ |
| Power | $(3,500 \times .30)=1,050$ | $(3,600 \times .3)+(1,400 \times .24)=1,416$ | $(3,600 \times .3)+(1,900 \times .24)=1536$ |
| Supervision | $480+(2 \times 120)=720$ | $480+\left(4^{*} 120\right)=880$ | $480+(5 \times 120)+180=1,260$ |

8. X Itd engineering Co. having 25 different types of automatic machines, furnishes you the following data for 2017-18 in respect of machine $P$
9. Cost of the machine

Life - 12 years
₹ 60,000
scrap value is nil
2. Overhead expenses are:

| Factory Rent | ₹ 95,000 p.a. |
| :--- | ---: |
| Heating and lighting | ₹ 55,000 |
| Supervision | ₹2,00,000 p.a. |
| Reserve equipment of Machinery P | ₹ 5,000 p.a. |
| Area of the factory | 90,000 sq. ft. |
| Area occupies | 3,000 sq. ft. |
|  |  |

3. Wages of operator is 32 per day of 8 hours including as fringe benefits. He attends to one machine when it is under set up and two machines while under operation
4. Estimated production hours 3,600 p.a.

Estimated set up time 400 hrs p.a.
Power 0.5 per hour

Prepare a schedule of comprehensive machine hour rate and find the cost of the following jobs:

|  | Job 1310 | Job 1410 |
| :--- | :---: | :---: |
| Set up time (Hrs) | 70 | 55 |
| Operation Time(Hrs) | 130 | 180 |

## Revisionary Test Paper December 2018

## Answer:

Computation of machine hour rate when machine is in operation

| Particulars |  | Amount $(₹)$ |
| :--- | :---: | ---: |
| Standing Charges |  | 4,750 |
| Rent | $95,000 * 4.5 / 90$ | 2750 |
| Heating \& lighting | $55,000^{*} 4.5 / 90$ | 10,000 |
| Supervision | $2,00,000^{*} 4.5 / 90$ | 5,000 |
| Reserve equipment |  | 22,500 |
|  |  | 5.63 |
| Cost per hour | $22,500 / 4,000$ |  |
| Machine Expenses: |  |  |
| Depreciation | $[60,000 /(10 \times 3600)=1.67$ |  |
| Wages | $3[32 / 8 \times 1 / 2]=2.00$ | 4.17 |
| Power | $=0.50$ | 9.8 |
| Machine Hour Rate |  |  |

Computation of machine hour rate when machine is under set up

| Particulars |  | Amount $(₹)$ |
| :--- | :--- | ---: |
| Standing Charges |  | 4,750 |
| Rent | $95,000 * 4.5 / 90$ | 2750 |
| Heating \& lighting | $55,000 * 4.5 / 90$ | 10,000 |
| Supervision | $2,00,000 * 4.5 / 90$ | 5,000 |
| Reserve equipment |  | 22,500 |
|  |  | 5.63 |
| Cost per hour | $22,500 / 4,000$ |  |
| Machine Expenses: | $[60,000 /(10 \times 3600)=1.67$ | $=4.00$ |
| Depreciation | $[32 / 8]$ | 5.67 |
| Wages |  | 11.3 |
| Power |  |  |
| Machine Hour Rate |  |  |

## Computation of cost of the jobs

| Particulars | Job 1310 (₹) | Job 1410 (₹) |
| :--- | :---: | :---: |
| Setup Cost <br> Job 1310: 70X11.30 <br> Job 1410: 130X11.30 | 791 | 1469 |
| Operation Cost <br> Job 1310: 130X9.8 <br> Job 1410: $180 \times 9.8$ | 1,274 | 1,764 |
| Total Cost of the Job | 2,065 | 3,233 |

## Revisionary Test Paper December 2018

## 9. (a) List of Scope of CAS-5 <br> (b) Write a short Note on CAS-22

## Answer:

(a) Scope of CAS -5

This standard should be applied for calculation of cost of transportation required under any statute or regulations or for any other purpose. For example, this standard can be used for:
(1) Determination of average transportation cost for claiming the deduction for arriving at the assessable value of excisable goods.
(2) Insurance claim valuation.
(3) Working out claim for freight subsidy under Fertilizer Industry Coordination Committee.
(4) Administered price mechanism of freight cost element.
(5) Determination of inward freight costs included or to be included in the cost of purchases attributable to the acquisition.
(6) Computation of freight included in the value of inventory for accounting on inventory or valuation of stock hypothecated with Banks / Financial Institution ...etc.
(b) CAS - 22: Cost Accounting Standard on Manufacturing Cost: This standard deals with the principles and methods of determining the Manufacturing Cost of excisable goods. This standard deals with the principles and methods of classification, measurement and assignment for determination of the Manufacturing Cost of excisable goods and the presentation and disclosure in cost statements.

## Objective

The objective of this standard is to bring uniformity and consistency in the principles and methods of determining the Manufacturing Cost of excisable goods.

## Scope

This standard should be applied to cost statements which require classification, measurement, assignment, presentation and disclosure of Manufacturing Cost of excisable goods.

## Revisionary Test Paper December 2018

Cost statements/Reconciliation/Integration/Item excluded from cost and normal and abnormal item
10. The Profit \& loss A/c of ABC Itd for the year ended 31st March, 2018 was as follows

Profit \& Loss A/C For the year ended 31 ${ }^{\text {st }}$ March, 2018

| Particulars | Amount(₹) | Particulars | Amount (₹) |
| :--- | ---: | :--- | ---: |
| To Materials | $7,20,000$ | By Sales @ 135 | $14,40,000$ |
| To Wages | $5,40,000$ | By Work in Progress |  |
| To Direct Expenses | $3,60,000$ | Material | 45,000 |
| To Gross Profit | $1,80,000$ | Wages | 27,000 |
|  |  | Direct Expenses | 18,000 |
|  |  | By Closing Stock | $2,70,000$ |
|  | $18,00,000$ |  | $18,00,000$ |
| To Administration Expenses | 90,000 | By Gross Profit | $1,80,000$ |
| To Net Profit | 99,000 | By Dividend Received | 9,000 |
|  | $1,89,000$ |  | $1,89,000$ |

As per the Cost records, the direct expenses have been estimated at a cost ₹30 per unit and administration expenses at ₹15 per unit. During the year production was 9,000 units and sales were ₹ $12,00,0000$.

Prepare a statement of Costing Profit \& Loss A/C and Reconcile the profit with financial profit.

## Answer:

Statement of Profit as per Cost Accounts

|  | Particulars | $₹$ |
| :---: | :--- | :---: |
| 1 | Direct Material | $7,20,000$ |
| 2 | Direct Material | $5,40,000$ |
| 3 | Prime Cost(1+2) | $12,60,000$ |
| 4 | Factory Overhead (9,000 Units X 30) | $2,70,000$ |
| 5 | Gross factory Cost (3+4) | $15,30,000$ |
| 6 | Work In progress $($ | 90,000 |
| 7 | Factory Cost(5-6) | $14,40,000$ |
| 8 | Office Overhead(17X9,000) | $1,35,000$ |
| 9 | Cost of Production (9,000 Units) | $15,75,000$ |
| 10 | Closing Stock of 1,000 units(working Note) | $2,70,000$ |
| 11 | Cost of goods sold(9-10) | $13,05,000$ |
| 12 | Profit(Balance Figure) | $1,35,000$ |
| 13 | Sales | $14,40,000$ |

## Revisionary Test Paper December 2018

| Calculation of Closing stock |  |
| :--- | ---: |
| Sales | $14,40,000$ |
| less: Gross Profit | $\underline{1,80,000}$ |
| Cost of sales | $12,60,000$ |
| Add: Closing Stock | $2,70,000$ |
| Add: Work -in-Progress | $\underline{90,000}$ |
| Cost of Produced | $\underline{16,20,000}$ |

Cost per unit $=\frac{16,20,000}{9,000}=₹ 180 \quad$ Unit of closing stock $=\frac{2,70,000}{1,500}=1,500$ units

| Profit as per Costing Profit And loss Account | $1,35,000$ |
| :--- | ---: |
| Add: Over recovery Adm. overhead | 45,000 |
| Add: Dividend Income | 9,000 |
|  | $1,89,000$ |
| Less: Under recovery factory overhead | 90,000 |
| Profit as per Financial Account | 99,000 |

11. Journalize the following transactions assuming that cost and financial accounts are integrated.

| Particulars | $₹$ |
| :--- | ---: |
| Raw material purchased | $\mathbf{4 5 , 0 0 0}$ |
| Direct materials issued to production | 33,000 |
| Wages paid (30\% indirect) | 36,000 |
| Wages charged to production | 25,200 |
| Manufacturing expenses incurred | 20,000 |
| Manufacturing overhead charged to Production | $\mathbf{1 8 , 5 0 0}$ |
| Selling and distribution cost | 4,000 |
| Finished products (at cost) | 50,000 |
| Sales | 60,000 |
| Closing stock | $\mathbf{N i l}$ |
| Receipts from debtors | 23,800 |
| Payments to creditors | $\mathbf{1 4 , 0 0 0}$ |

## Revisionary Test Paper December 2018

## Job Costing

13. In a factory following the Job Costing Method, an abstract from the work in process as at 31 st March, was prepared as under.

| Job No | Material | Direct Labour | Factory Overhead Applied |
| :---: | :---: | :---: | :---: |
| 215 | 1590 | 400 hrs 800 | 640 |
| 222 | 972 | 250 hrs 500 | 400 |
| 230 | 918 | 300 hrs 475 | 380 |
|  | 3,480 | 1,775 | 1,420 |

Materials used in April were as follows:

| Material requisitions No. | Job no. | Cost |
| :---: | :---: | :---: |
| 44 | 222 | 360 |
| 45 | 222 | 510 |
| 46 | 222 | 618 |
| 47 | 230 | 798 |
| 48 | 231 | 1092 |
| 49 | 233 | 864 |

A summary of Labour Hours deployed during April is as follows

| Job No | Shop A | Shop B |
| :--- | :---: | :---: |
| 215 | 25 | 25 |
| 222 | 90 | 30 |
| 230 | 75 | 10 |
| 231 | 65 | - |
| 233 | 20 | 1 |
|  | 275 | 66 |
| Indirect Labour |  |  |
| Waiting for material | 10 | 5 |
| Machine breakdown | 5 | 6 |
| Idle time | 6 | 5 |
| Overtime premium | 316 | 92 |
|  |  |  |

A shop credit slip was issued in October, that material issued under requisition No. 44 was returned back to stores as being not suitable. A material transfer note issued in October indicated that material issued under requisition No. 45 for Job 222 was directed to Job 23.

## Revisionary Test Paper December 2018

The hourly rate in shop $X$ per labour hour is ₹ 3 while at shop $Y$ it is₹ 2 per hour. The factory overhead is applied at the same rate as in April; Jobs 215, 222 and 230 were completed in October.

You are asked to compute the factory cost of the completed jobs. It is practice of the management to put a $10 \%$ on the factory cost to cover administration and selling overheads and invoice the job to the customer on a total cost plus $20 \%$ basis what would be the invoice price of these three jobs?

Answer:

Calculation of Selling price of the Job

| Job No | 215 | 222 | 230 |
| :---: | :---: | :---: | :---: |
|  | ₹ | ₹ | ₹ |
| Material | 1590 | 972 | 918 |
| Labour | 800 | 500 | 475 |
| Overhead | 640 | 400 | 380 |
| Total(A) | 3030 | 1872 | 1773 |
| Cost in April |  |  |  |
| Material |  | 618 | 798 |
| Labour |  |  |  |
| (25x3)+(25X2) | 125 |  |  |
| (90X3)+(30X2) |  | 330 |  |
| (75X3)+(10X2) |  |  | 245 |
| Overheads (80\%) | 100 | 264 | 196 |
| Total(B) | 225 | 1212 | 1239 |
| Total Factory Cost(A+B) | 3255 | 3084 | 3012 |
| Add: Admin Overheads-10\% | 325.5 | 308.4 | 301.2 |
|  | 3580.5 | 3392.4 | 3313.2 |
| Profit | 716.1 | 678.48 | 662.64 |
| Selling Price | 4296.6 | 4070.88 | 3975.84 |

14. The data pertaining to Heavy Engineering Ltd. using are as follows at the end of 31.3.2017. Direct material ₹8,10,000; Direct wages ₹6,75,000; Selling and distribution overhead $₹ 4,72,500$; Administrative overhead ₹3,78,000 Factory overhead $₹ 4,05,000$ and Profit ₹5,48,100.
(a) Prepare a cost sheet showing all the details.
(b) For 2012-13, the factory has received a work order. It is estimated that the direct materials would be ₹ $10,80,000$ and direct labour cost $₹ 6,75,000$. What would be the price of work order if the factory intends to earn the same rate of profit on sales, assuming that the selling and distribution overhead has gone up by $15 \%$ ? The factory recovers factory overhead as a percentage of direct wages and administrative and selling and

## Revisionary Test Paper December 2018

distribution overheads as a percentage of works cost, based on the cost rates prevalent in the previous year.

Answer:
Statement of Cost \& Profit

| Particulars | $₹$ |
| :--- | ---: |
| Direct Material | $8,10,000$ |
| Direct Wages | $6,75,000$ |
| Prime cost | $14,85,000$ |
| Factory Overheads (60\%) | $4,05,000$ |
| Works Cost | $18,90,000$ |
| Administration Overheads(20\% works cost) | $3,78,000$ |
| Cost of Production | $22,68,000$ |
| Selling \& Distribution Overheads(25\% works cost) | $4,72,500$ |
| Cost of Sales | $27,40,500$ |
| Profit(1/5 of Cost) | $5,48,100$ |
| Sales | $32,88,600$ |

Estimated price of work order

| Particulars | $₹$ |
| :--- | ---: |
| Direct Material | $10,80,000$ |
| Direct Wages | $6,75,000$ |
| Prime cost | $17,55,000$ |
| Factory Overheads (60\%) | $4,05,000$ |
| Works Cost | $21,60,000$ |
| Administration Overheads(20\% works cost) | $4,32,000$ |
| Cost of Production | $25,92,000$ |
| Selling \& Distribution Overheads(40\% works cost) | $8,64,000$ |
| Cost of Sales | $34,56,000$ |
| Profit(1/5 of Cost) | $6,91,200$ |
| Sales | $41,47,200$ |

## Process Costing

15. CG Ltd. is engaged in process Engineering Industry. During the month of April, 2015, 3,000 units were introduced in Process ' $X$ '. The normal loss was estimated at $5 \%$ of input. At the end of the month 2,100 units had been produced and transferred to process Y. 690 units incomplete and 210 units after passing through fully the entire process had to be scrapped. The incomplete units had reached the following stage of completion.

## Revisionary Test Paper December 2018

| Material | $75 \%$ completed |
| :--- | :--- |
| Labour | $50 \%$ completed |
| Overhead | $50 \%$ completed |

Following are the further information on the Process ' $X$ '

| Cost of the 3,500 units | $₹ 87,000$ |
| :--- | :--- |
| Additional Direct Material | $₹ 21,600$ |
| Direct Labour | $₹ 50,100$ |
| Direct Overhead | $₹ 25,050$ |

Units scrapped realized 15 each. Prepare Statement of Equivalent Production. Statement of Cost, Statement of Evaluation and Process X Account.

Answer:

Statement of Equivalent Production

## Joint Product and By Product

16. In the course of manufacture of the main product ' $P$ ' by products ' $A$ ' and ' $B$ ' also emerge. The joint expenses of manufacture amount to ₹ $1,19,550$. All the three products are processed further after separation and sold as per details given below:

|  | Main Product | By Product |  |
| :--- | :---: | :---: | :---: |
|  | $\mathbf{A}$ | $\mathbf{X}$ | $\mathbf{Y}$ |
| Sales | $1,35,000$ | 90,000 | 60,000 |
| Cost incurred After separation | 9,000 | 7,500 | 6,000 |
| Profit as \% on sales | 25 | 20 | 15 |

Total fixed selling expenses are $10 \%$ of total cost of sales which are apportioned to the three products in the ratio of $20: 40: 40$.
(a) Prepare a statement showing the apportionment of joint costs to the main product and the two by products.
(b) If the by-product X is not subjected to further processing and is sold the point of separation for which there is a market, at ₹ 93,600 without incurring any selling expenses. Would you advise its disposal at this stage. Show the workings.

## Answer:

(a) Statement showing computation of share of joint expenses

## Revisionary Test Paper December 2018

| 3 | Cost of Sales (1-2) | $1,01,250$ | 72,000 | 51,000 | $2,24,250$ |

| 5 | Manufacturing Cost(3-4) | 96,765 | 63,030 | 42,030 | $2,01,825$ |
| 6 | Separate Costs | 9,000 | 7,500 | 6000 | 22,500 |
| 7 | Share of Joint Expenses (5-7) | 87,765 | 55,530 | 36,030 | 179,325 |

Sales at split off $(X)=93,600$
$(-)$ Joint Cost (X) $=55,530$

$$
=38,070
$$

(b) It is better to sell By-Product ' X ' at split off point because it gives more profit ₹ 38,070 against profit after processing ₹ 18,000 .

## Operating Costing

17. Union Transport Company supplies the following details in respect of a truck of 8 tonne capacity

| Cost of Truck | ₹1,80,000 |
| :--- | :--- |
| Estimated Life | 10 years |
| Diesel, Oil, Grease | ₹20 per trip each way |
| Repairs and maintenance | ₹1,130p.m |
| Driver's wages | ₹700 p.m |
| Cleaner's wages | $₹ 450$ p.m |
| Insurance | $₹ 9,600$ per year |
| Tax | ₹4,800 per year |
| General supervision charges | $₹ 6,000$ per year |

The truck carries goods to and from the city covering a distance of 60 kms . each way. On outward trip freight is available to the extent of full capacity and on return $20 \%$ of capacity.

Assuming that the truck runs on an average $\mathbf{2 5}$ days a month, work out:
(a) Operating cost tonne-km.
(b) Rate for tonne per trip that the company should charge if a profit of $50 \%$ on freight is to be earned.

## Answer:

| Particulars | Amount(₹) |
| :--- | ---: |
| Repairs and Maintenance | 1,130 |

## Revisionary Test Paper December 2018

| Driver's wages | 700 |
| :--- | ---: |
| Cleaner's wages | 450 |
| Insurance | 800 |
| Tax | 400 |
| General supervision charges | 500 |
| Depreciation | 1,500 |
| Diesel, Oil, Grease | 1,000 |
| Total Cost per Month(A) | 6,480 |
| Tonne Kms =25[(60x8)+(20/100x60x8)] (B) | 14,400 |
| Cost Per Tonne km (C)=(A/B) | 0.45 |
| $50 \% P r o f i t ~ o n ~ f r e i g h t ~(100 ~ \% ~ o n ~ c o s t)(D) ~$ | 0.45 |
| Rate per Tonne km | 0.90 |

18. A Primary School has a total students consisting of 5 section with 30 students per section. The school plans for outing around the city during the weekend. A private transport operator has come forward to hire the buses for taking the students. Each bus will have a maximum capacity of 50 (excluding 2 seats reserved for teachers accompanying the students).The school will employ two teachers for each bus, paying them an allowance of ₹150 per teacher. The operator will hire out the required number of buses. The following are the other cost estimates:

| Break Fast | ₹12 per Student |
| :--- | ---: |
| Lunch | ₹24 per Student |
| Tea | ₹5 per Student |
| Entrance fee at zoo | ₹5 per Student |
| Rent per bus | 2,600 |
| Special permit fees | ₹200 per bus |
| Block entrance fees at planetarium | ₹600 |
| Prizes to student for games | ₹400 |

No cost are incurred in respect of accompanying teachers (except allowance of 100 per teacher)
You are required to prepare a statement showing total cost also average cost per student for the levels of $30,60,90,120,150$ students.

Answer:

Statement of Variable Cost

| Student | $\mathbf{3 0}$ | $\mathbf{6 0}$ | $\mathbf{9 0}$ | $\mathbf{1 2 0}$ | $\mathbf{1 5 0}$ |
| :--- | ---: | ---: | ---: | ---: | ---: |
| Breakfast @12/student | 360 | 720 | 1080 | 1440 | 1800 |
| Lunch @24/student | 720 | 1440 | 2160 | 2880 | 3600 |
| Tea @ 5/student | 150 | 300 | 450 | 600 | 750 |

## Revisionary Test Paper December 2018

| Entrance fee @ 5/student | 150 | 300 | 450 | 600 | 750 |
| :--- | ---: | ---: | ---: | ---: | ---: |
| Total | 1380 | 2760 | 4140 | 5520 | 6900 |

Statement of Semi Variable cost

## Statement of cost per Student

| Student(A) | 30 | 60 | 90 | 120 | 150 |
| :--- | ---: | ---: | ---: | ---: | ---: |
| Total Variable Cost | 1,380 | 2,760 | 4,140 | 5,520 | 6,900 |
| Total Semi Variable Cost | 3,100 | 6,200 | 9,000 | 12,400 | 15,200 |
| Total Fixed Cost | 1,000 | 1,000 | 1,000 | 1,000 | 1,000 |
| Total Cost(B) | 5,480 | 9,960 | 14,140 | 18,920 | 23,100 |
| Average cost (A/B) | 182.67 | 166.00 | 157.11 | 157.67 | 154.00 |

## Contract Costing

19. XYZ limited undertook a contract for $6,25,000$ on 1st July, 2016. On 30th June 2017 when the accounts were closed, the following details about the contract were gathered

| Particulars | $₹$ |
| :--- | :---: |
| Material Purchased | $1,25,000$ |
| Wages paid | 56,250 |
| General expenses | 15,000 |
| Plant purchases | 25,000 |
| Materials on hand $30-6-2017$ | 31,250 |
| Wages accrued $30-6-2017$ | 6,250 |
| work certified | $2,50,000$ |
| Cash received | $1,875,00$ |

## Revisionary Test Paper December 2018

| Depreciation of Plant | 5,000 |
| :--- | :---: |
| Work uncertified | 18,750 |

The above contract contained an escalator clause which read as follows:
"In the event of prices of materials and rates of wages increase by more than $5 \%$ the contract price would be increased accordingly by $25 \%$ of the rise in the cost of materials and wages beyond $5 \%$ in each case".
It was found that since the date of signing the agreement the prices of materials and wage rates increased by $25 \%$ the value of the work certify does not take into account the effect of the above clause. Prepare the contract account. Working should form part of the answer.

## Answer:

Cost of material \& wages incurred $=₹(1,25,000+56,250+6,250-31,250)=₹ 1,56,250$
Cost of material \&wages before increase in prices $=₹(1,56,250 \times 100 / 125)=1,25,000$
Increase in contract price $=25 / 100[1,56,250-(1,25,000 \times 105 / 100)]=₹ 6,250$

## Revisionary Test Paper December 2018

The work on Contract No. 47 was commenced on 1st January, 2017 materials costing ₹ $2,04,000$ were sent to the site of the contract but those of 7,200 were destroyed in an accident. Wages of $₹ 2,16,000$ were paid during the year. Plant with a cost of 2.4 lakhs was used from 1st January to 30th September and was then returned to the stores. Materials of the cost of ₹4,800 were at site on 31st December, 2017.

The contract was for $₹ 7,20,000$ and the contractee pays $75 \%$ of the work certified. Work certified was $80 \%$ of the total contract work at the end of 2017. Uncertified work was estimated at ₹ 15,000 on 31 st December, 2015 .Expenses are charged to the contract at $\mathbf{2 5 \%}$ of wages. Plant is to be depreciated at $10 \%$ for the entire year.

## Answer:

|  |  | $(-)$ Reserve | $\underline{54,000}$ | $1,80,000$ |

## Revisionary Test Paper December 2018

|  |  |  |  |  |
| :--- | ---: | :--- | :--- | ---: |
|  |  | Material |  | 40,800 |
|  |  | Bank |  | 42,000 |
|  | $7,24,800$ |  |  | $7,24,800$ |

## Marginal Costing

21. A company manufactures a product currently utilizing $80 \%$ capacity with a turnover of 40,000 units at a selling price of $₹ 25$ per unit. The variable cost of the product is $₹ 17.5$ per unit fixed cost amounts ₹ $1,87,500$ Up to $80 \%$ level of output and there will be an additional cost of supervision amounting to ₹ 25,000 beyond that level.

## Calculate:

(i) Activity Level (\%) at breakeven point
(ii) Number of units to be sold to earn a net income of $10 \%$ of sales.
(iii) Activity Level (\%) to earn a profit of $₹ 1,87,500$.

## Answer:

Capacity utilized $80 \%$
Turnover at $80 \%$ capacity $=40,000$ units.
Turnover at $100 \%$ capacity $=50,000$ units.
Fixed cost ₹ $1,87,500$, Fixed cost at more than ₹2,12,500
Selling price = ₹ 25
Contribution per unit = ₹7.50
PVR $=7.5 / 25 \times 100=30 \%$
(i) $\mathrm{BEP}=\frac{\text { Fixedcost }}{\text { Contributio } / \text { unit }}=\frac{1,87,500}{7.5}=25,000$ unit.

Activity level in $\%=25,000 / 50,000=50 \%$
(ii) (a) If fixed cost is ₹ $1,87,500$

Let desired sales be X units
Desired sales $=\frac{\text { Fixedcost } t+\text { DesiredProfit }}{\text { PVR }}$

$$
\begin{aligned}
& x=\frac{1,87,500+.10 x}{.30} \\
& x=₹ 9,37,500
\end{aligned}
$$

Number of units $=9,37,500 / 25=37,500$ units
As activity level is less than 40,000 units, hence additional supervision cost will not be applicable.
(b) If fixed cost is ₹ $1,87,500$

Let desired sales be X units
Desired sales $=\frac{\text { Fixedcos } t+\text { DesiredProfit }}{\text { PVR }}$

## Revisionary Test Paper December 2018

$$
\begin{aligned}
& \qquad \begin{array}{l}
X=\frac{2,12,500+.10 x}{.30} \\
X \\
X
\end{array}=₹ 10,62,500 \\
& \text { Number of units }=10,62,500 / 25=42,500
\end{aligned}
$$

(iii) Number of units to be sold to earn a profit of ₹ $1,87,500$

$$
\text { Number of units }=\frac{1,87,500+1,87,500}{7.5}=50,000 \text { units }
$$

Activity level $=100 \%$
22. The operating statement of a company is as follows:

|  | $₹$ | $₹$ |
| :--- | :---: | :---: |
| Sales(1,00,000 @ 18.75 each) |  | $18,75,000$ |
| Cost: Variable |  |  |
| Material | $3,00,000$ |  |
| Labour | $4,00,000$ |  |
| Overheads | $\underline{2,00,000}$ |  |
|  | $9,00,000$ |  |
|  | $4,00,000$ | $\underline{13,00,000}$ |
|  |  | $5,75,000$ |

The capacity of the plant is $\mathbf{1 . 2 5}$ lakh units. A customer from U.S.A is desirous of buying 25,000 units at a net price of 12.50 per unit. Advice the producer whether or not offer should be accepted. Will your advice be different, if the customer is local one.

## Answer:

Statement showing computation of profit before after accepting the order (in ₹)

| Particulars | Present Position(Before <br> accepting ) 1,00,000 | Order Value <br> 25,000 | Total (After <br> accepting) $1,25,000$ |  |

## Revisionary Test Paper December 2018

24. The following results of a company for the last two years are as follows:

| Year | Sales(₹) | Profit(₹) |
| :---: | :---: | :---: |
| 2017 | $3,00,000$ | 30,000 |
| 2018 | $3,80,000$ | 50,000 |

You are required to calculate:
(i) $P / V$ Ratio
(ii) B.E.P
(iii) The Sales required to earn a profit of 50,000
(iv) Profit when sales are 8,00,000
(v) Margin of safety at a profit of ₹ 50,000
(vi) Variable costs of two periods.

Answer:
(i) $\mathrm{P} / \mathrm{V}$ ratio $=($ Change in profit $/$ Change in sales $) \times 100$

$$
=(20,000 / 80,000) \times 100=25 \%
$$

(ii) Fixed Cost $=($ Sales $X$ P/V ratio)-Profit

$$
=(3,00,000 \times 25 \%)-30,000=₹ 45,000
$$

Break Even Sales $=$ Fixed Cost/PV ratio $=₹ 45,000 / 25 \%=₹ 1,80,000$
(iii) Sales required to earn a profit of ₹50,000 $=\frac{\text { Fixedcost }+ \text { Desiredprofit }}{P / \text { VRatio }}=₹ 9,20,000$
(iv) Profit at sales ₹5,00,000 = (Sales $\times$ P/V ratio)-Fixed Cost $=2,00,000-1,80,000=₹ 20,000$
(v) Margin of Safety at profit of 50,000 = profit/PV ratio $=50,000 / 25 \%=₹ 2,00,000$
(vi) Variable cost for $2017=3,00,000 \times 75 \%$ ) $=₹ 2,25,000$

Variable cost for $2018=(3,80,000 \times 75 \%)=₹ 2,85,000$
25. Hotel Seven Star has annual fixed costs applicable to rooms of $₹ 18,00,000$ for a rent a 360 rooms hotel with average daily room rates 480 and average variable costs $₹ 72$ for each room rented. The Hotel operates 365 days per year. It is subject to an income tax rate of $30 \%$. You are required to:
(i) Calculate the number of rooms the Hotel must rent to earn a net income after taxes of ₹ $12,00,000$
(ii) Compute the break-even point in terms of rooms rented.

## Revisionary Test Paper December 2018

## Answer:

(i)

| Suppose Income before tax | 100 |
| :--- | ---: |
| Less :Income Tax | 30 |
| Income after Tax | 70 |

Income before tax corresponding to $12,00,000$ income after tax $=(100 / 70) \times 12,00,000=$ ₹ $17,14,286$

| Fixed Cost per annum | $₹ 18,00,000$ |
| :--- | :--- |
| Add: Income before Tax | $₹ 17,14,286$ |
| Total Desired Contribution | $₹ 35,14,286$ |

Daily Contribution per room day $=(480-72)=₹ 402$
Total Sales Value $=$ Total desired contribution/PV ratio

$$
=35,14,286 /(402 / 480)=₹ 29,43,215
$$

No of rooms days $=29,43,215 / 480=6,136$ (Approx)
The Hotel must rent out 16.81 rooms per day ( $6,136 / 365$ days) to derive a total contribution of $₹ 35,14,571$, this will give the Hotel after tax profit of $₹ 12,00,000$.
(ii) B.E Sales $=$ Fixed Cost/Daily Contribution per room $=18,00,000 / 402=₹ 4,478$ (approx)
26. The following Miscellaneous information regarding the operations of 2017 has been available from the Record of GS Corporation.

|  | $₹$ |
| :--- | :---: |
| Sales | $1,20,000$ |
| Direct Materials used | 48,000 |
| Direct Labour | 18,000 |
| Fixed Manufacturing Overhead | 24,000 |
| Fixed Selling and Administration Expenses | 12,000 |
| Gross Profit | 24,000 |
| Net Loss | 6,000 |

There are no beginning or ending inventories. You are required to Calculate:
(i) Variable Selling and Administration Expenses
(ii) Factory Cost of Goods Sold
(iii) Variable Factory Overhead
(iv) Contribution of Margin in rupees
(v) Break-Even Point in rupee sales

## Revisionary Test Paper December 2018

## Answer:

(i) Net Loss $=$ Gross profit - Fixed Selling and Administration - Variable Selling \& Administration Expenses
Or, $(6,000)=24,000-12,000-$ Variable Selling \& Administration Expenses
Variable Selling \& Administration Expenses $=₹ 18,000$
(ii) Cost of goods sold $=$ Sales - Gross profit $=1,20,000-24,000=₹ 96,000$
(iii) Cost of Goods Sold $=$ Direct Material Used + Direct Labour + Fixed Manufacturing Overhead + Variable Manufacturing Overhead
Or, $96,000=48,000+18,000+24,000+$ Variable Manufacturing Overhead
Variable Manufacturing Overhead $=₹ 6,000$
(iv) Contribution $=$ Sales-Variable Costs $=1,20,000-(48,000+18,000+18,000+6,000)=₹ 30,000$
(v) BEP (in ₹ ) $=$ Fixed cost/PV ratio $=\frac{24,000+12,000}{30,000 / 1,20,000} \times 100=₹ 1,44,000$

## Standard Costing \& Variance Analysis

27. The standard set for material consumption was 100 kg @ ₹ 3.25 per unit.

In a cost period:
Opening stock was 100 kg @ ₹ 3.25 per unit.
Purchases made 500 kg @ ₹ 3.15 per unit.
Consumption 110units

Calculate: a)Usage Variance b)Price Variance

1) When variance is calculated at point of purchase
2) When variance is calculated at point of issue on FIFO basis
3) When variance is calculated at point of issue on LIFO

## Answer:

a) Computation of Material Usage Variance

Material Usage Variance $=$ SQSP - AQSP

$$
\begin{aligned}
& =S P(S Q-A Q) \\
& =3.25(100-110) \\
& =₹ 32.50 \text { (A) }
\end{aligned}
$$

## Revisionary Test Paper December 2018

b) Computation of Price variance:

1) When Variance is calculated at the point of purchase:

Price variance $=A Q S P-A Q A P$

$$
\begin{aligned}
& =(110 \times 3.25)-(110 \times 3.15) \\
& =₹ 11(F)
\end{aligned}
$$

2) When variance is calculated at the point of issue on FIFO basis

Price variance $=A Q S P-A Q A P$

$$
\begin{aligned}
& =(110 \times 3.25)-([100 \times 3.25]+[10 \times 3.15]) \\
& =₹ 1(F)
\end{aligned}
$$

3) When variance is calculated at the point of issue on LIFO basis

Price variance $=A Q S P-A Q A P$

$$
\begin{aligned}
& =(110 \times 3.25)-(110 \times 3.15) \\
& =357.50-346.5 \\
& =₹ 11(F)
\end{aligned}
$$

28. The Standard labour complement and the actual complement engaged in a week for a job are as under:

| Particulars | Skilled <br> workers | Semi Skilled <br> Worker | Unskilled <br> workers |
| :--- | :---: | :---: | :---: |
| a) Standard no. of workers in the group | 64 | 24 | 12 |
| b) Standard wage rate per hour | 6 | 4 | 2 |
| c) Actual no. of workers employed <br> in the group during the week | 56 | 36 | 8 |
| d)Actual wage rate per hour | 8 | 6 | 4 |

During the 40 hour working week the group produced 3,600 standard labour hours of work. Calculate

| 1)Labour Efficiency Variance | 2) Mix Variance | 3)Efficiency Variance |
| :--- | :--- | :--- |
| 4)Labour Rate Variance | 5)Labour Cost Variance |  |

## Answer:

Analysis of Given Data

|  | Standard Data |  |  | Actual Data |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Hours | Rate | Value | Hours | Rate | Value |
| Skilled | $64 \times 40=2,560$ | 6 | 15,360 | $56 \times 40=2,2240$ | 8 | 17,920 |
| Semi Skilled | $24 \times 40=960$ | 4 | 3,840 | $36 \times 40=1440$ | 6 | 8,640 |
| Unskilled | $12 \times 40=480$ | 2 | 960 | $8 \times 40=320$ | 4 | 1,280 |
|  | 4,000 |  | 20,160 | 4,000 |  | 27,840 |

## Revisionary Test Paper December 2018

Computation of Required Values

|  | SRSH(1)( ₹) | SRESH(2)( ₹) | SRAH(3) ( ₹) | ARAH(4) ( ₹) |
| :--- | ---: | ---: | ---: | ---: |
| Skilled | $6 \times 2,304=13,824$ | 15,360 | $2,240 \times 6=13,440$ | 17,920 |
| Semi Skilled | $4 \times 864=3,456$ | 3,840 | $1,440 \times 4=5,760$ | 8,640 |
| Un Skilled | $2 \times 432=864$ | 960 | $320 \times 2=640$ | 1,280 |
|  | 18,144 | 20,160 | 19,840 | 27,840 |

SH = (SH for that worker/SH for all the worker) $\times A Q$ for that worker
For Skilled worker $)=(2,560 / 4,000) \times 3,600=2,304$
For Semi Skilled $=(960 / 4,000) \times 3.600=864$
For Unskilled $=(480 / 4,000) \times 3,600=432$
Computation of Labour Variances:

1. Labour sub Efficiency Variance $=(1)-(2)=(18,144-20,160)=2,016(\mathrm{~A})$
2. Labour Mix Variance $=(2)-(3)=(20,160-19,840)=320$ (F)
3. Labour Efficiency Variance $=(1)-(3)=(18,144-19,840)=1,696(\mathrm{~A})$
4. Labour Rate Variance $=(3)-(4)=(19,840-27,840)=8,000(\mathrm{~A})$
5. Labour Cost Variance $=(1)-(4)=18,144-27,840=9,696$ (A)

## Budget \& Budgetary Control

29. The monthly budget for manufacturing overhead of a concern for two levels of activity were as follows:

| Capacity | $50 \%$ | $90 \%$ |
| :--- | ---: | ---: |
| Budgeted Production(units) | 1,000 | 1,800 |
| Wages | 1,000 | 1,800 |
| Consumable Stores | 750 | 1,350 |
| Maintenance | 900 | 1,500 |
| Power and Fuel | 1,600 | 2,000 |
| Depreciation | 2,000 | 5,000 |
| Insurance | 2,000 |  |

## You are required to:

(i) Indicate which of the items are fixed, variable and semi variable;
(ii) Find the total cost, both fixed and variable per unit of output at $60 \%, 80 \%$ and $100 \%$ capacity

## Answer:

(i) Fixed--Depreciation, Insurance

Variable - Wages, Consumable stores
Semi- Variable -Maintenance, Power and Fuel

## Revisionary Test Paper December 2018

| Maintenance $=$ | Variable | $(1500-900) / 800=0.75$ per unit and |
| :--- | :--- | :--- |
|  | Fixed | $=900-(1,000-750)=150$ per unit |
| Power and Fuel $=$ | Variable | $(2,000-1,600) / 800=0.25$ per unit and |
|  | Fixed | $=1,600-\left(1,000^{*} .25\right)=1,350$ per unit |

(ii)

| Capacity | $60 \%(1,200$ units) |  | $80 \%(1,600$ units) |  | $100 \%(2,000$ units) |  |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: |
|  | Total | Per Unit | Total | Per Unit | Total | Per Unit |
| Fixed Cost |  |  |  |  |  |  |
| Depreciation | 5,000 |  | 5,000 |  | 5,000 |  |
| Insurance | 2,000 |  | 2,000 |  | 2,000 |  |
| Maintenance | 150 |  | 150 |  | 150 |  |
| Power \& Fuel | 1,350 |  | 1,350 |  | 1,350 |  |
| Total Fixed Cost(A) | 8,500 | 7.08 | 8,500 | 5.31 | 8,500 | 4.25 |
| Variable Cost |  |  |  |  |  |  |
| Wages @ l per Unit | 1,200 |  | 1,600 |  | 2,000 |  |
| Consumable stores @ | 2,400 |  | 3,200 |  | 4,000 |  |
| Maintenance | 900 |  | 1,200 |  | 1,500 |  |
| Power and Fuel | 300 |  | 400 |  | 500 |  |
| Total Variable cost (B) | 4,800 | 4.00 | 6,400 | 4.00 | 8,000 | 4.00 |
| Total Cost(A+B) | 13,300 | 11.08 | 14,900 | 9.31 | 16,500 | 8.25 |

30. Short Notes
(a) Difference between Financial Accounting \& Management Accounting
(b) Advantages of Marginal Costing (Any five)
(c) Performance Budgeting
(d) Features of Process Costing
(e) Difference between Merit Rating and Job Evaluation.

## Answer:

(a) Differences between Financial Accounting \& Management Accounting

| SI. No. | Financial Accounting | Management Accounting |
| :---: | :--- | :--- |
| (i) | Provides general business information <br> like P\&L account, Balance Sheet | Specific information relating to specific <br> problems and decision making. |
| (ii) | Information for owners and outside <br> parties | Information is for management for <br> optimizing decisions. |
| (iii) | Importance is on recording rather <br> than control | Emphasis is on control like using details <br> of materials, labour, etc for standard <br> costing, budgetary control. |
| (iv) | All commercial transactions between <br> the business and external parties are <br> recorded. | Concerned with Internal transaction not <br> involving payment or receipt |

## Revisionary Test Paper December 2018

| (v) | Only those transactions that can be <br> measured in monetary terms are <br> recorded. | Other parameters like cost units, <br> apportioning bases are also recorded. |
| :---: | :--- | :--- |
| (vi) | Efficiency of resource utilization men/ <br> materials or machine is not available | Available for corrective action. |
| (vii) | Stocks are valued at cost or market <br> value, whichever is lower. | Always valued at cost. |
| (viii) | Records are maintained as per <br> Companies Act and as per Income <br> Tax Act | Records are maintained as per Companies <br> Act only in certain cases, that too as per <br> Cost Accounting requirements, but mainly <br> to suit |

## (b) Advantages of Marginal Costing:

1. Marginal costing system is simple to operate than absorption costing because they do not involve the problems of overhead apportionment and recovery.
2. Marginal costing avoids, the difficulties of having to explain the purpose and basis of overhead absorption to management that accompany absorption costing. Fluctuations in profit are easier to explain because they result from cost volume interactions and not from changes in inventory valuation.
3. It is easier to make decisions on the basis of marginal cost presentations, e.g., marginal costing shows which products are making a contribution and which are failing to cover their avoidable (i.e., variable) costs. Under absorption costing the relevant information is difficult to gather, and there is the added danger that management may be misled by reliance on unit costs that contain an element of fixed cost.
4. Marginal costing is essentially useful to management as a technique in cost analysis and cost presentation. It enables the presentation of data in a manner useful to different levels of management for the purpose of controlling costs. Therefore, it is an important technique in cost control.
5. Future profit planning of the business enterprises can well be carried out by marginal costing. The contribution ratio and marginal cost ratios are very useful to ascertain the changes in selling price, variable cost etc. Thus, marginal costing is greatly helpful in profit planning.
6. When a business concern consists of several units and produces several products and evaluation of performance of such components can well be made with the help of marginal costing.
7. It is helpful in forecasting.
8. When there are different products, the determination of number of units of each product, called Optimum Product Mix, is made with the help of marginal costing.
9. Similarly, optimum sales mix i.e., sales of each and every product to get maximum profit can also be determined with the help of marginal costing.
10. Apart from the above, numerous managerial decisions can be taken with the help of marginal costing, some of which, may be as follows:-
(a) Make or buy decisions,
(b) Exploring foreign markets,

## Revisionary Test Paper December 2018

(c) Accept an order or not,
(d) Determination of selling price in different conditions,
(e) Replace one product with some other product,
(f) Optimum utilisation of labour or machine hours,
(g) Evaluation of alternative choices,
(h) Subcontract some of the production processes or not,
(i) Expand the business or not,
(j) Diversification,
(k) Shutdown or continue,

## (c) Performance Budgeting:

Performance Budgeting is synonymous with Responsibility Accounting which means thus the responsibility of various levels of management is predetermined in terms of output or result keeping in view the authority vested with them. The main concepts of such a system are enumerated below:
(a) It is based on a classification of managerial level for the purpose of establishing a budget for each level. The individual in charge of that level should be made responsible and held accountable for its performance over a given period of time.
(b) The starting point of the performance budgeting system rests with the organisation chart in which the spheres of jurisdiction have been determined. Authority leads to the responsibility for certain costs and expenses which are forecast or present in the budget with the knowledge of the manager concerned.
(c) The costs in each individual's or department's budget should be limited to the cost controllable by him.
(d) The person concerned should have the authority to bear the responsibility

## (d) Features of Process Costing:

(i) Production is done having a continuous flow of products having a continuous flow of identical products except where plant and machinery is shut down for repairs etc.
(ii) Clearly defined process cost centres and the accumulation of all costs by the cost centres.
(iii) The maintenance of accurate records of units and part units produced and cost incurred by each process.
(iv) The finished product of one process becomes the raw material of the next process or operation and so on until the final product is obtained.
(v) Avoidable and unavoidable losses usually arise at different stages of manufacture for various reasons.
(vi) In order to obtain accurate average costs, it is necessary to measure the production at various stages of manufacture as all the input units may not be converted into finished goods.
(vii) Different products with or without by-products are simultaneously produced at one or more stages or processes of manufacture. The valuation of by-products and

## Revisionary Test Paper December 2018

apportionment of joint cost before joint of separation is an important aspect of this method of costing.
(viii) Output is uniform and all units are exactly identical during one or more processes. So the cost per unit of production can be ascertained only by averaging the expenditure incurred during a particular period.
(e) Difference between the Merit Rating and Job Evaluation are as follows
(a) Job Evaluation is the assessment of the relative worth of jobs within a business enterprise and Merit Rating is the assessment of the employees with respect to a job.
(b Job Evaluation helps in establishing a rational wage and salary structure. On the other hand, Merit Rating helps in fixing fair wages for each worker in terms of his competence and performance.
(c) Job Evaluation brings uniformity in wages and salaries while Merit Rating aims at providing a fair rate of pay for different workers on the basis of their performance.
