Case Scenario 2

Roop & Co. are the auditors of Onda group of Hotels. This is the first time the firm is auditing an industry in food and beverages and it is day one of the audit. The engagement partner along with his team wants to make a thorough understanding of the entity and its environment in order to identify and assess the risks of material misstatements, whether due to fraud or error. The following are some of the points identified by them on Day 1.

1. The hotel has two banquet halls. The documentation available for verification of banquet hall revenue is only the invoice raised by the hotel and some mail conversations on customer enquiry and finalization of price. In audit trail, it is found that finance approval of the transaction is only after invoice is sent to them for accounting at final settlement. Advance paid by the clients are not vetted through finance team. The auditor suspects a weakness in this system.
2. The auditor also finds a control deficiency in the process of procurement of stores. A goods receipt note is not prepared at the time of receipt of goods. On enquiry with management, the auditor finds that there exists a system control wherein goods receipt note is automatically prepared and approved in the system once the quantity and price of goods is entered against specific vendor. This entry is on real-time basis and system does not allow back dated entries.
3. The auditor enquires of the management as to what is risk assessment process followed by the entity for prevention and detection of risk of material misstatement due to fraud and error. The auditor finds there is no documented risk assessment process.

With the help of the above facts, answer the following questions by choosing the correct option.
